

Training Activity and Testing of the Educational Toolkit in Barcelona

11 April 2023

YoungArcHers

15 teachers, education and cultural heritage experts met in Barcelona to participate in an amazing 4-day event dedicated to the testing of the Educational Toolkit created in the framework of the Young ArcHers programme! 🧑🏫🏠 The event was hosted by Universitat Autònoma de Barcelona (UAB).

The programme's school partners (22nd Elementary School of Athens and Morningside Montessori Elementary School) were represented by 6 primary teachers trained to subsequently become the trainers of their colleagues and support their students over local activities foreseen to take place in the coming months. The programme's non-school partners (KOENA, UAB, CIP and MONUMENTA) were represented by 9 trainees with a background in architectural heritage, intercultural education, UDL and accessibility.

The participants had the opportunity to review all materials contained in the Young ArcHers Toolkit, including 4 lesson plans, to provide valuable feedback on the texts' final versions and to validate the selected heritage architecture paths proposed in the involved local contexts (Athens, Barcelona, Nicosia and Paris). They also had the chance to learn a lot about architectural heritage while walking among impressive buildings of the city of

Barcelona and discovering traces of the building's stories in the Block of Discord and the Raval district. 🏛️

Young ArcHers is an Erasmus Plus project which targets primary school teachers and their students (9-12yo). The aim of the project is to promote the protection of heritage buildings in partner cities (Paris, Nicosia, Athens and Barcelona), by developing educational materials and tools with diversity, inclusion, and accessibility in mind.

Stay tuned while we strive for perfection! The content will be available soon on the [YoungArcHers project website!](#) 😊
