

YoungArchHers project multiplier events across Europe #MeetTheYoungArchHers_EU

8 January 2024

YoungArchHers

We are delighted to share with you that the latest events organized by the consortium of partners in their respective cities have been a great success! These multiplier events took place in Nicosia/Larnaca, Athens, Barcelona and Paris, during the final months of the project (November and December 2023).

The aim of these events was to gather professionals from different backgrounds (architecture, heritage, education, accessibility) to network and discuss this project's results and their future exploitation across Europe.

Here's a reminder of the context of our project: Young ArchHers is an Erasmus+ project which targets primary school teachers and their students (9-12yo). The aim of the project is to promote the protection of heritage buildings in partner cities (Paris, Nicosia, Athens and Barcelona), by developing educational materials and tools with diversity, inclusion, and accessibility in mind.

You can now check all the results and content created on the [project's website](#).
